

NA Miata Baby Mud Guards (Front)

Size and hole locations worked on my 95 NA. OEM NA mudguards (fit 89-97) were removed and fit fine. These holes should work on any NA Miata. Use 1/8" ABS plastic or similar material. Generic \$10 mud guards can be cut to this shape to fit.

Material can be formed with a heat gun after trimming to better conform to the fender shape.

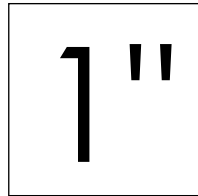

~14.3" long by 4.35" wide.

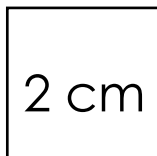

Flip over for a template on the opposite side of the car.

5/16" holes

This hole might benefit from being slotted slightly.

This square measures 1"

This square measures 2cm
